

## Prakriti Resort and Organic Farm Receives Prestigious Travelife Gold Certification

We are delighted and deeply honoured to announce that Prakriti Resort and Organic Farm has received the prestigious Travelife Gold Certification—a significant recognition of our long-standing commitment to responsible tourism, sustainability, and the well-being of our environment, people, and local community.

This achievement is an important milestone in our journey. Travelife Gold recognizes our efforts to meet rigorous international standards in sustainable tourism and reflects the fact that sustainability is embedded in the way we operate and in the values that guide us.

Our commitment includes responsible water and energy use, wastewater treatment, waste reduction, composting and biochar initiatives, biodiversity protection, organic farming, ethical employment practices, and meaningful engagement with local communities.

Located within the fragile ecological landscape of Shivapuri–Nagarjun National Park, Prakriti has always believed that hospitality should exist in harmony with nature. Our organic farm, indigenous planting, natural water resources, low-impact infrastructure, local food systems, and community partnerships reflect this philosophy.

### From Sustainable Tourism to Regenerative Tourism

Travelife Gold is not the end of our journey—it is another important step forward.

Our next ambition is to move from sustainable hospitality towards regenerative hospitality, where we aim not only to reduce our impact but to create a positive contribution to nature, local communities, culture, and the wider destination.

As our next step, Prakriti Resort and Organic Farm is preparing to embark on a regenerative tourism journey with Regenera Luxury, with the objective of working towards regenerative tourism certification.

Building upon our Travelife foundation, this journey will focus on restoring nature and biodiversity, regenerating soil and water systems, reducing carbon emissions, strengthening local livelihoods

and organic farming, preserving indigenous culture and knowledge, and creating deeper connections between our guests, community, and the living landscape.

We see regeneration as a continuous journey of learning, restoring, improving, and giving back.

We are deeply grateful to our team, local communities, partners, guests, suppliers, and well-wishers who have supported us along the way.

Travelife Gold marks what we have achieved.

Our regenerative journey with Regenera Luxury represents where we are going next.

We invite our guests and partners to join us as we continue our journey from sustainable tourism to regenerative tourism, striving to leave a positive and lasting legacy for nature, people, and future generations.

Prakriti Resort and Organic Farm

Hospitality in Harmony with Nature — Regenerating the Future Together.
